

Sprint #4 Report

WikiTrust - WT Team - 12/02/19

Actions to stop doing:

- The team should stop working individually
- The team should stop doing remote meetings
- The team members should stop waiting around for someone else to make a decision

Actions to start doing:

- Increase weekly meeting to 4 times a week
- The team should start to meet in person more often.
- Update slack with current progress on a certain task
- Go to lecture regularly and take good notes for our other teammates
- Split up work more evenly and not have more than ½ the team on a specific component
- Help mentor the other undergrad students on our team
- Update the release plan when needed
- Give evidence to scrum master for the TSR reports
- Keep following our defined style guide that we outlined and update it when needed

Actions to keep doing:

- Regular meetings with the TA scott
- Keep the scrum board updated and use it more often
- Continuing team meetings at least 3 times a week
- Constant communication and not afraid to ask for help
- Continue holding end of sprint meetings
 - Go over what went wrong and why
 - Complete reports/plans
- The team should keep in communication with professor Luca and the other grad students
- The team should keep setting up achievable goals for sprints.
- Keep attending sponsor presentations (at least 5)

Work completed/not completed:

- Bryan

Work completed:

- Wrote a chrome extension that accesses a Wikipedia page.
- Added pop-up that shows scores.
- Created score animations using bootstrap and JQuery.
- Wrote an algorithm that grabs a Wikipedia page URL and connects it with the Database.

- Cagan

Work completed:

Write an algorithm that connects the components of the completed algorithms in order to calculate the trust value of a text.

Re-write the algorithm to calculate the overall trust value of an article to make it compatible with the final algorithm.

- Joe

Work Completed:

Created DAO's for the extension to use

Transfer react code into the chrome extension engine.

Altered DB structure for new flat data

Process new pages in the backend

Work NOT Completed:

Allow new pages to be crawled upon request

Work completion rate:

- Cagan:

Total number of completed user stories:

Total number of work hours completed: 16

- Joseph:

Total number of completed user stories: 1

Total number of work hours completed: 20

- Bryan:

Total number of completed user stories: 4

Total number of work hours completed: 26
