

Sprint #3 Report

WikiTrust - WT Team - 11/17/19

Actions to stop doing:

- The team should stop working individually
- The team should stop doing remote meetings
- The team members should stop waiting around for someone else to make a decision

Actions to start doing:

- Increase weekly meeting to 4 times a week
- The team should start to meet in person more often.
- Update slack with current progress on certain task
- Go to lecture regularly and take good notes for our other teammates
- Split up work more evenly and not have more than $\frac{1}{2}$ the team on specific component
- Help mentor the other undergrad students on our team
- Update the release plan when needed
- Give evidence to scrum master for the TSR reports
- Keep following our defined style guide that we outlined and update it when needed

Actions to keep doing:

- Regular meetings with the TA scott
- Keep the scrum board updated and use it more often
- Continuing team meetings at least 3 times a week
- Constant communication and not afraid to ask for help
- Continue holding end of sprint meetings
 - Go over what went wrong and why
 - Complete reports/plans
- The team should keep in communication with professor Luca and the other grad students
- The team should keep setting up achievable goals for sprints.
- Keep attending sponsor presentations (at least 5)

Work completed/not completed:

- Bryan
 - Work completed:**
 - I was able to clean the data coming from the Wiki Engine to remove embedded CSS
 - Was able to pull list of past 'n' revisions of a specific article
 - I was able to create objects of wikipedia compiled revisions (of text) in the wiki engine.
- Cagan

Work Completed:

- I have studied the previous trust assigning algorithm.
- Wrote the first version of the trust assigning algorithm to compute the overall value of a text as it will be displayed.
- Joseph
 - Need to finish up react front end
 - Create a user friendly api
 - Created a runner to connect all files in our project
 - Transferred data to firestore
 - Created 2 databases:
 - One to store articles
 - One to store diffs
 - Finishing DB wrapper to
 - Read/Wrote diff
 - Read/Write articles
 - Finished algo for creating the uid for 2 article versions

Work completion rate:

- Cagan:
 - Total number of completed user stories: 1
 - Total number of work hours completed: 18
- Joseph:
 - Total number of completed user stories: 1
 - Total number of work hours completed: 20
- Bryan:
 - Total number of completed user stories: 2
 - Total number of work hours completed: 12
