Sprint #2 Report

WikiTrust - WT Team - 10/03/19

Actions to stop doing:
- The team should stop working individually
- Waiting around for someone else to make a decision

Actions to start doing:
- Decide quickly on what to do and execute it
- Keep the scrum board updated and use it more often
- Follow our defined style guide that we outlined
- Go to lecture regularly and take good notes for our other teammates
- Split up work more evenly and not have more than ½ the team on specific component
- Help mentor the other undergrad students on our team
- Attend sponsor presentations (at least 5)
- Update the release plan when needed
- Give evidence to scrum master for the TSR reports

Actions to keep doing:
- Regular meetings with the TA scott
- Continuing team meetings at least 3 times a week
- Constant communication and not afraid to ask for help
- Continue holding end of sprint meetings
  - Go over what went wrong and why
  - Complete reports/plans
- The team should keep in communication with professor Luca and the other grad students

Work completed/not completed:
- Bryan
  - I was able to write the data from wikipedia into a file
  - Next step is to figure out how to pipe the data to the other components like the diff engines
- Cagan
  - **Work Completed:**
  - Determined the accuracy of the chdiff.py program
  - Determined output of the program as lists
  - Wrote output to local file system
  - Modified program to allow input to be 2 file headers
- Joseph
  - Able to determine AWS will be our host for this project

- We will have two databases:
  - Once metadata
  - One diff database
- Started work on db controller so that other team members can easily write to the db
- Need to finish controller and make it usable anywhere
  - Put diff
  - Pull diff
  - Pull metadata
- Need to write algo to create unique hash for comparing the two versions

Work completion rate:
- Cagan:
  - Total number of completed user stories: 2
  - Total number of work hours completed: 15
- Joseph:
  - Total number of completed user stories: 2
  - Total number of work hours completed: 12
- Bryan:
  - Total number of completed user stories: 2
  - Total number of work hours completed: 14
